

## **PHOTOGRAPHS OF STUDENTS**

Recognizing that most students and parents want to retain some permanent impression or keepsake as a reminder of their school experiences from year to year, the MSAD #68 School Board sanctions the practice of negotiations and contractual obligations between commercial photographers and the Superintendent of Schools as a service to the students, and as part of the total school program.

No student, however, will be required to have a picture taken or will be pressured for the purchase of photographs.
