Elementary News:

Literacy:

Kindergarten: February vacation packet will be coming home on Friday. Please take time to read and write over vacation with your child. Happy Vacation!

Grade 1: We will be switching up groups a little as the second round slots open up for Reading Recovery. Keep reading with and to your child, the more they read the better they will be.

Grades 2, 3 and 4: Students have been making great gains these past few weeks. Please continue to read with your child and ask questions about the book. This will greatly help with their comprehension. Have a wonderful February break and keep on reading!

Math

Kindergarten: We continue to work our way through the “tricky” teens. We also have started simple addition using part/part/whole. Please keep practicing counting out loud to 20 or more. Also using flashcards to do “speed rounds” will help with number identification!

First Graders: We are learning how to use base 10 blocks for place value. We are practicing, 1’s, 10’s, and 100’s place. Show your child the number 25 and see if they can tell you how many are in “tens house” or “ones house”. We also continue to work on addition/subtraction, money, and time. Count out loud with your child by 2’s, 5’s, and 10’s up to 120. Thanks for your continued help at home.

Second Graders: We have been continuing with mad minutes, money, time, and now measurement in centimeters. We have been measuring everything from erasers, pencils, books, and pinky fingers. Remember to keep practicing counting by 2’s, 5’s, and 10’s. Also, while at the store allow your child to keep a running list of how much your final bill might be. Real world use of money helps them with concepts in the classroom too!

Third and fourth graders: We are focusing on multiplication fact mastery. This basic skill is so important for math in the upper grades as well as for many situations in life! Please help your child practice their facts for just 10 minutes each night!

Middle School News:

February 16th, 2018

Math: Mrs. Greenlaw

Grade 5: The fifth grade students have been working with volume of rectangular prisms. This week they have been demonstrating what they have learned in project form. Some kids have chosen to make posters, poems, build shapes out of legos, etc. Students are having fun, working hard and learning through “doing”. Please continue to practice those math facts if they are not memorized yet. It makes a HUGE difference! Keep working hard, fifth graders!

Grade 6: Sixth graders are currently working with integers. They are learning about adding, subtracting, multiplying and dividing positive and negative numbers. Students are working hard! Keep up the great work, sixth graders!

Grade 7: Seventh graders are working with scale factor. They are learning how to determine scale factor, how to use scale factor and why we would need scale factor. Students are working very hard and seeking help when needed. **Please have your child check web2school for any missing assignments, getting those finished up over vacation week will help keep or get your child on track.**

Grade 8: The eighth grade students have been working on transformations of geometric shapes. This involves reflections, translations, rotations and dilations. This week students took a break from regular curriculum to do a fun workshop day on budgets based on the profession of their choosing. |

Have a wonderful vacation week!

****Please check web2school for any missing assignments/upgrades available. Please contact me at sgreenlaw@sedomocha.org if you have any questions or concerns or just want to check in!****
